

**Alert : Performance issue at U2 Web DE 4.4.1 and 4.4.2**

Versions 4.4.1 and 4.4.2 of U2 Web Development Environment (U2Wed DE) have an issue with performance.

This issue is found in the RedBack Object server running on a UniVerse database. If you are running the U2 Web DE server component together with UniData as the database, you are not experiencing this issue.

The versions of U2 Web DE affected may run as much as 3 times slower on UNIX system and potentially 10 times slower on Windows.

A patch for this issue can be requested by contacting your U2 support provider.

The contact information for U2 Support is found at the following link:

[U2 Support Contact information](#)

If you have a VAR, you will have to contact your VAR to obtain the patch.
